

A surveillance camera system can benefit your patients and clients in many ways

- Protect patient:** A video surveillance system in an office lobby or file room can help keep patient's medical records and identities safe. Healthcare security cameras can also keep patients safe while they're waiting to visit the doctor.
- Protect supplies:** Video surveillance systems can help protect medical supplies range from inexpensive items to expensive devices.
- Remote monitoring:** Surveillance footage may be viewed remotely from the internet or a mobile phone.

Healthcare surveillance systems would be ideal for

- Pharmacies
- Hospitals
- Elder Care
