

A surveillance camera system can benefit your patients and clients in many ways

- **Protect patient:** A video surveillance system in an office lobby or file room can help keep patient's medical records – and identities- safe. Healthcare security cameras can also keep patients safe while they're waiting to visit the doctor.
- **Protect supplies:** Video surveillance systems can help protect medical supplies range from inexpensive items to expensive devices.
- **Remote monitoring:** Surveillance footage may be viewed remotely from the internet or a mobile phone.

Healthcare surveillance systems would be ideal for…

- Pharmacies
- Hospitals
- Elder Care
